

Junior Engineering for Kids Camps (ages 4-7)

Junior Wings, Wheels and Sails

Everyone has to travel, and engineers are involved in all the steps of designing different modes of transportation as well as inventing and designing tools that aid in travel. Everyone's travel needs are different, whether they need to walk around their local community to do errands or they need to be half way across the world by evening. During this camp, students will get their passports and travel to a new country every day by a different means! They will engineer their mode of transportation or tool to aid in transportation daily to get to their destination country.
