Recommendations

Here are some recommendations on making your sign an effective communication piece for your event. These are not required, but can make your sign work more effectively. The average driver will have six (6) seconds or less to safely read your sign.

- Use contrasting colors.
- Light backgrounds with darker letters tend to read better.
- Keep the message short and letters large. Ideal height for letters is seven (7) inches.
- Do not use script or fancy lettering and avoid fonts with thin letters. Use thick, easy-to-read letters.
- Try to keep your message under six (6) lines of copy.
- Make event and contact information largest and boldest.
- Give a general idea of your event and a way to contact you for details.
- Include: event, time, date, place, organization, contact information.
- Make any graphics large and easy to recognize.

Don't be afraid to leave some open space, it makes your sign easier to read and more effective. Too much coverage clutters your message and people are less likely to read it.
